DESIGN ENGINEER

Design Engineer with 5+ years shipping production interfaces at Amazon and AWS — building design systems, implementing pixel-perfect Figma-to-code UI, and improving accessibility for products reaching 30M+ customers across 20+ global markets. I combine front-end engineering with design and UX sensibility, use AI tools daily, and run my own studio, The CB Creative, where I own projects end-to-end.

SKILLS

Engineering: JavaScript, TypeScript, React, Redux, HTML, CSS, Tailwind CSS, Node.js, jQuery

Design & Design Systems: Figma, design systems, design tokens, design-to-dev handoff, Photoshop, Illustrator, Canva

UX & Accessibility: WCAG accessibility testing, information architecture, user flows, cross-browser/cross-device QA

Testing & Quality: Jest, Vitest

AI-Assisted Development: Claude Code, Figma AI

PROFESSIONAL EXPERIENCE

Frontend Engineer II

2025 – 2026

Amazon Web Services — Seattle, WA

- Built the auto-role-creation feature for AWS S3 Batch Operations, dynamically scoping IAM trust and permissions policies across 16 templates — eliminating manual IAM setup for customers running bulk jobs, developed through iterative review with the security team.
- Resolved audit-flagged WCAG issues and built automated guardrails to catch inaccessible UX before it shipped, advancing projects toward WCAG 2.1 AA compliance.
- Wrote and maintained automated tests (Jest, Vitest), achieving 95%+ coverage as a standing part of code review and release workflows.

Functional Marketing Manager

2024 – 2025

Amazon.com — Seattle, WA

- Coded CX experiments and product launches for Amazon Prime, partnering with product on experimentation strategy and independently running layout experiments.
- Led migration to a new CMS, aligning design, engineering, and marketing while maintaining brand consistency across 20+ global markets.

Web Development Engineer I – II

2021 – 2024

Amazon.com — Seattle, WA

- Built reusable UI components (JavaScript, HTML, CSS, Freemarker) contributing to a shared design system used across worldwide ecommerce CX surfaces reaching millions of customers.
- Delivered the frontend for an Apple device-specific upsell feature reaching 30M+ customers, pixel-perfect and cross-browser.
- Implemented production UI directly from Figma handoffs and design tokens, partnering closely with designers to translate design intent into code.
- Mentored 2 engineers formally, plus others informally; led demos and documentation that helped stakeholders adopt tooling systems.

Frontend Developer, Freelance

2020

Influencer Performance Marketing & Lightning Law — Seattle, WA

- Designed and built mobile-responsive marketing sites and landing pages from scratch on tight client timelines, leading information architecture and user flow decisions.

PROJECTS

- Blog Composer (demo: caitburke.dev/work/blog-composer/demo) — Modular, typed, Vitest-tested blog admin package designed to power multiple client sites: reusable core logic, pluggable data adapters, auth, and transactional email.
- a11y-gate (npm i a11y-gate) — Published accessibility gate for CI/build pipelines: runs axe-core against rendered pages and fails the build on critical WCAG violations, configurable per project.
- Personal Website (thecbcreative.com) — Designed and built end-to-end with Claude Code on a custom component-driven build pipeline, styled with Tailwind CSS; shipped and live. (2026)

EDUCATION & CERTIFICATIONS

Certificate, Advanced Software Development in Full-Stack JavaScript — Code Fellows, Seattle, WA

B.S. General Studies, Advertising — University of Idaho, Moscow, ID
